Portrait Photography

What is the difference between a picture of someone and a portrait?

A Portrait suggests a story and is interesting whether or not you know the person or people in the photograph
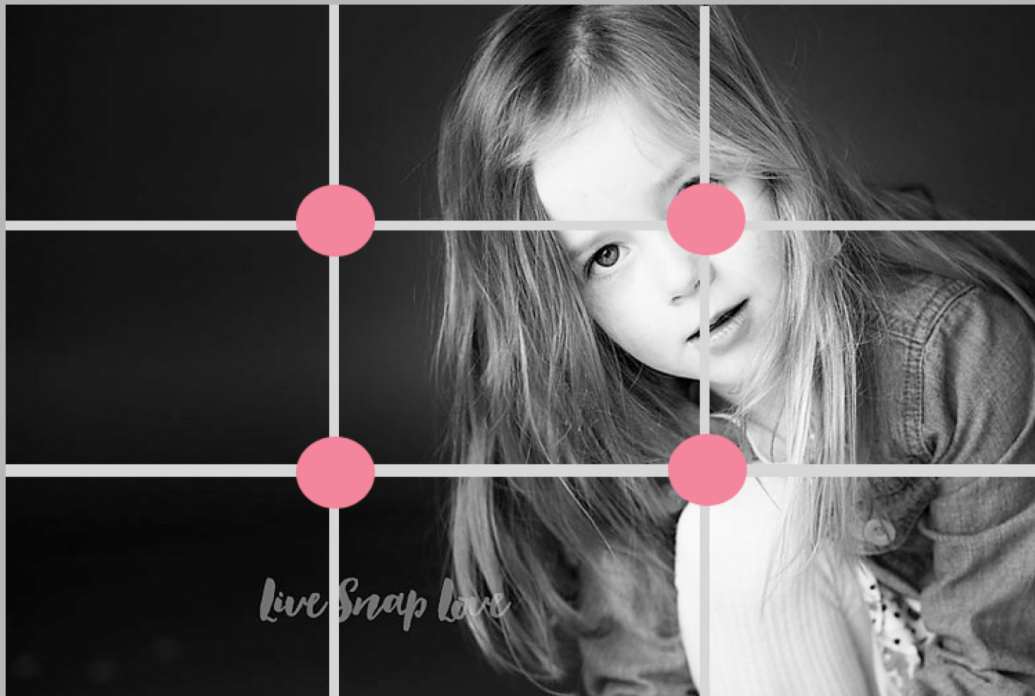

TASK 1
Complete the SEE, THINK, WONDER worksheet for one (or both!) of these portraits

Composition Tools
to create great portraits

Rule of thirds

Our eyes are naturally drawn to the points where these lines intersect (the pink circles)

Placing the subject in one of these intersections gives the photograph more balance and interest

Framing

Think about the setting (background) for your portrait, maybe choose a place that creates a natural frame around your subject.

Diagonals

Diagonals help guide your viewer's eyes to the main subject, purpose or story of your photograph.

Natural Light Source

All of these photos use natural light from outdoors to light their subjects and create shadows. Take your portraits by a windows, or better yet, go outside!

Which photography concepts were used in this image?

Natural light

Diagonals

Portrait Challenge

- Create photographic **portraits of 2 of your family members**

- Try to use the photography concepts introduced here and the idea of different views that you worked with in your last iPad Photography assignment.

- Take at least **10 different pictures of each subject.**

- Choose your **two BEST** and save them to share with Ms. Garfield.

I SEE	
I THINK	
I WONDER	

I SEE
